

## Working out a relevant dependent child amount

*Use this table to work out the relevant dependent child amount for each child you and/or the other parent care for from a second or subsequent family. When you've calculated this amount, transfer it to the child support worksheet.*

For help and information, click on the hyperlinks throughout this worksheet.

| Work out the relevant dependent child amount  | Parent 1 | Parent 2 |
|---|----------|----------|
| The parent's adjusted taxable income  | \$       | \$       |
| Deduct the self-support amount from the parent's adjusted taxable income                          | -\$      | -\$      |
| Income left over  | \$       | \$       |
| Care percentage of the child  | %        | %        |
| Cost percentage of the child  | %        | %        |
| Cost of the child—but only use the income of the parent for who you are working the allowance out | \$       | \$       |
| Multiply the cost of the child by the cost percentage   | \$       | \$       |
| Relevant dependent child amount for the child   | = \$     | = \$     |
